Understanding Your 2027 Medicare Part D Drug Costs and Payment Options:
The $2,400 Annual Cap and the Medicare Prescription Payment Plan

What Is the Maximum Out-of-Pocket (OOP) Cost for Medicare Part D Prescription Drugs?

In 2027, the maximum patient OOP cost for covered Medicare Part D drugs is $2,400. Once this amount is reached, patients will pay $0 for covered drugs for the remainder of the calendar year.

What Is the Medicare Prescription Payment Plan (M3P)?

M3P is a program administered by Medicare Part D insurance plans to help manage OOP prescription drug costs for Part D participants. This program helps by spreading those costs into monthly payments over the calendar year.

Key Information About M3P

- ✓ M3P is a voluntary program available to individuals enrolled in a Medicare Part D or Medicare Advantage prescription drug plan.
- ✓ It may help make covered prescription drug costs more manageable throughout the year.
- ✓ M3P does not reduce what you pay in total for the year—it simply spreads your costs over time. There are no fees or interest charges to participate.
- ✓ Rather than paying at the pharmacy, your prescription drug plan will send you a separate monthly bill for the amount you owe.
- ✓ You must opt in to participate and can do so anytime throughout the year, including during Medicare Open Enrollment.

How to Opt Into M3P

How Does M3P Work?

Example: Patient enrolls in M3P in January and fills prescriptions that reach the annual OOP maximum during this first month.

Month	OOP Costs Without M3P	OOP Payment With M3P
January	$2,400	$200
February	$0	$200
March	$0	$200
April	$0	$200
May	$0	$200
June	$0	$200
July	$0	$200
August	$0	$200
September	$0	$200
October	$0	$200
November	$0	$200
December	$0	$200

To estimate your own monthly payments, visit **GetMyMeds.com*** for a free cost calculator

Actual monthly payments will vary based on when you enroll in M3P, your prescription drug costs, and when those costs are incurred during the year.
